

Aeronautical.ca takes flight during the Laval Job and Training Fair

Montreal, September 28, 2010 – New job site Aeronautical.ca will officially launch October 1, during the Laval Job and Training Fair. Created by jobWings Careers, this Canada-wide site targets all jobs in the air transport and aeronautics field, including maintenance, R&D, construction, logistics, mechanics, air control, ground handling and customer service. A wide variety of jobs are represented including technicians, technologists, engineers, flight attendants, pilots and support functions.

“Located near the key aeronautics centres of Mirabel and St. Laurent, the first Laval Job and Training Fair is a perfect opportunity to launch Aeronautical.ca,” said Manuel Francisci, jobWings Careers President. The new site is bilingual and covers all provinces across the country. Internet visitors will also find information on aeronautics jobs, how to search for jobs in their field and training.

Aeronautical.ca joins the jobWings Careers family of 15 specialized job boards. According to Manuel Francisci, “Until now, aeronautical jobs were published on our site specializing in technical careers, Techjobs.ca. This leading Canadian sector deserved its own site, however.”

About jobWings Careers:

jobWings Careers is the Canadian leader in specialized job boards, with 16 boards covering a wide range of sectors. These sites are all part of the Publipac.ca service, the only Canadian niche job board network. jobWings Careers is also the founder of Nicejob.ca, the most popular Canadian job search engine. Created in 2001, jobWings Careers first board, jobWings.com, has become a reference for Canadian finance and accounting professionals.
